

Green Irene Green Home Makeover

Our flagship service for your home or apartment is a \$99 Green Home Makeover. Would you spend a few hundred dollars to save a few thousand dollars while making the healthiest possible home for your family AND having a positive impact on the environment? Even in tough times, most people answer YES to this question!

The amount of information about going green is overwhelming and often conflicting. Who do you trust to provide the best information about greening your home? Your **local** Green Irene Eco-Consultant, supported by the resources of Green Irene LLC, is the **knowledgeable green friend** you have been wishing for. He or she has all the tools and information necessary to move you and your family toward a healthier, greener life. Let them share their knowledge!

What Can I Expect When an Eco-Consultant Arrives at my Home?

Our Green Home Makeover generally takes from 60-90 minutes. When your local Green Irene Eco-Consultant walks through your home with our **Green Home Makeover Checklist**, he or she will point out immediate changes you can make at no cost while customizing a set of recommendations on how you can save money, save energy, save water and live a healthier life. The Green Home Makeover concentrates on the interior of your home, though it touches upon yard areas as well. You need to be present and be an active participant in the process.

We review the **Green Home Makeover Report** towards the end of our visit and discuss with you how to best capitalize on the recommendations. Our **Family Action Plan** gives you the opportunity to assign specific tasks to each member of the family to involve everyone in reaching your goal of a more sustainable lifestyle. We also offer you **Green Irene Guides** to various topics and include the valuable **Ask Green Irene** service. Your local Green Irene will also be able to refer you to other qualified green professionals in your area as part of our **Sustainable Contractors Network**.

Our Green Home Makeover Report will also introduce you to **Green Irene recommended products**, some of which we offer for sale in person or through an online catalog. You will want to consider incorporating these to help in your efforts to green your home and save money.

Green Home Makeover Topics Include:

- **Energy Conservation**
- **Energy Efficient Lighting**
- **Water Conservation**
- **Water Purity**
- **Toxic Free Living**
- **Indoor Air Quality**
- **Waste Reduction and Recycling**
- **Shrinking your Family's Carbon Footprint**
- **Safety and Emergency Preparedness**

We'll Show You How Much Money Our Green Products Can Save You

Here are just three examples of dozens of money saving green ideas we can help you implement as part of a 60-90 minute Green Home Makeover. Many of our ideas are actions you can implement that do not cost a penny. Other changes require a small investment to earn big dividends.

Let your local Green Irene do an inventory of your wasteful incandescent lighting and show you how to save \$1,000s on your electric bill. Your consultant can show you the actual

bulbs and you can see how they look in your home. We carry the best dimmable CFLs as well as all shapes and sizes of the best Energy Star bulbs available. One client spent an incremental \$358 upgrading to 57 CFLs and cold cathodes and is saving \$6,300 over the life of the first set of bulbs.

The Green Irene Water Conservation Kit for a two-bathroom home will save up to \$8,000 in energy costs over 7 years with an investment of only \$133. The energy and water you save from your shower, toilet and faucets makes a big impact on your utility bill as well as a positive impact on the

Want to green your home but not ready to make “going green” your hobby? Rely on Green Irene to do the work and give your family the benefits of a Green Home Makeover.

environment. You don't need to spend hours researching the best low flow showerheads (1.59 gallons per minute) that feel like your current wasteful ones. We have already done that for you.

Wondering how much a specific device costs to run each year? Our Kill-A-Watt tool will help you understand what each appliance or device costs to run each year using your local electricity rate. Your TV, computers, video game consoles and other devices use energy constantly, even

when “off”. Your local Green Irene has tools to measure the cost of this “phantom” energy use and a way to eliminate half of the \$200 a year we normally find wasted.

We'll Show You How a Green Home is a Healthy Home

What about some great non-toxic cleaning products? We have them. We'll help you clear your home of harmful cleaning agents.

Our HVAC filters are a giant step ahead of those old fiberglass filters (MERV 1) you currently use. We offer electrostatic, washable (reusable) filters you never have to buy again as well as MERV 13 filters, a very high filtering level, to take allergens and pollutants out of your home air as they pass through your HVAC.

Green Irene's Support Extends Beyond the Consultation

Included in the price of your Green Home Makeover is a three-month **“Ask Green Irene” Membership** which gives you access to our extensive green knowledge base. As questions arise on the path to greening your corner of the world, you receive e-mail support not only from your local Eco-Consultant, but also from Green Irene LLC's staff of green researchers. You don't have to spend hours researching each new green innovation on the market: we do all that for you and add solutions to our database daily. All you have to do is ask!

Rely on your local Green Irene Eco-Consultant to help you and your family along your path to a greener, healthier, more sustainable lifestyle. If you join us, together we'll be **“Greening Our World, One Home at a Time”!**

About Green Irene

Green Irene will lead your co-workers and family to a healthier, safer and more sustainable lifestyle and save you money, energy, and water with our consulting services and green home and green office products.
